Loads like a flatbed... ...protects like a van™

We are pleased to present the new generation of Chameleon Rolling Tarps; designed to reduce operation costs with increased functionality.

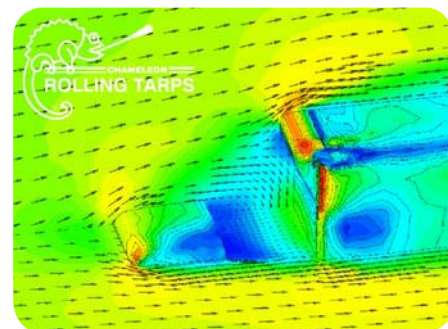

When we design a rolling tarp, we keep in mind that you want to haul larger & heavier loads, keep your loads dry and have a system that opens and closes trouble-free. Chameleons are designed to give you peace of mind and to save you money.

Aerodynamic Headboard Design

The aerodynamics of the Chameleon headboard and integrated air deflector were optimized using an air flow analysis software to offer you improved fuel economy while reducing the effects of tarp inflation and flapping. All air deflectors come standard and are equipped with recessed LED clearance lights.

Simplified Functionality

- 1 Safety First**
Our systems are fully operable without putting a foot on the truck or trailer
- 2 Haul Larger Loads**
The standard compact corners and unintrusive tensioning system gives you the most load volume on the market.
- 3 Haul Heavier Loads**
We minimize the weight of our systems so that you can maximize the weight of your load.
- 4 Reduce Downtime**
The modular design of every Chameleon permits quick and easy repairs.
- 5 Keep Your Loads Dry**
Be confident that the merchandise that you are hauling remains dry in the worst weather.
- 6 Increase Your Company's Exposure**
We strive to offer you good looking equipment & graphics that will uphold your company's image.
- 7 Increase Driver Satisfaction**
Retain your best Drivers with this easy-to-operate and reliable tarp system.
- 8 Customize Your Chameleon**
We offer and design the accessories that you want & need (van doors, digital photo graphics, double lift bows & more).
- 9 We Guarantee**
We are so confident in the quality of our products that we offer a warranty of 18 months on all parts and labor.
- 10 We Deliver Industry Leading Service**
No matter where you are or where you go, you are not very far from an authorized Chameleon Service Center.

Locked

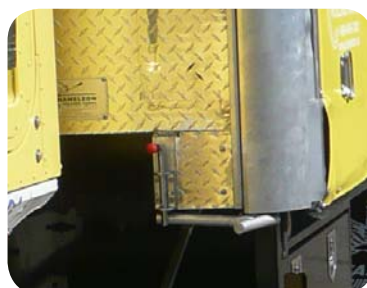

Unlocked

The adjustable rear lock gives you the ability to fine tune your tarp tension.

Ergonomic rear door closures

Open and close the front of the tarp in two easy steps; with one integrated handle.

Operating a rolling tarp system has never been easier than with the new generation of Chameleons. Ergonomics are important. Chameleon wants to get you safely loaded, unloaded and back into your truck asap. This is why we design everything that you touch to be quick and easy to operate even when you have gloves on.

Load Clearance

A Chameleon will add only 4 1/4" to the overall width of your deck. This means that on a 102" deck you still have a space of 1 3/4" to pass your hooks & straps between the rolling tarp rails and deck (this is not possible with any other rolling tarp)! Additionally, all Chameleons now come standard with a rear door that rolls up and onto the roof of the system. This feature coupled with our optional double lift bows (reducing tarp hang to less than 3" when system is retracted), industry-leading compact corner design and unobtrusive tensioning offers you unprecedented clearance for high loads. We also obey federal width limits with a headboard that remains 102", even on overwidth systems. Visit www.rollingtarps.com to learn more about our industry leading load clearances.

Inside view showing optional double lift bows and standard translucent roof

Weatherproof Sealing

Not only does our new wing design cut down on drag, it also incorporates a gasket to create an impenetrable seal with the sides of the headboard.

Chameleon's patented wing design compresses both top and side gaskets so that water will not leak into the front of the tarp system.

Elsewhere, we maintain the added security of our rear door gaskets (gasket compresses between door and bow) and dual-mudguard rails, leaving you with a completely sealed volume to keep your loads dry.

Dual mudguards

Dual mudguards are flexible enough to wrap around straps and chains and to keep road spray away from your load.

Advanced Part Replacement

The new generation of Chameleons feature an advanced tarp, door, door lock and wing attachment system. These components require only a minimal number of fasteners thus cutting repair costs and downtime in half. Unavoidable accidents do occur and we are continually expanding our service center network and ease-of-repair to keep you on the road.

Chameleon systems are supported by the **most accessible** authorized Dealer & Service Network in North America
