

Chameleon Rolling Tarps

"Engineered to save you money & time"

Loads like a flatbed... protects like a van!™

www.rollingtarps.com

We are pleased to present the new generation of Chameleon Rolling Tarps; designed to reduce operation costs with increased functionality.

When we design a rolling tarp, we keep in mind that you want to haul larger & heavier loads, keep your loads dry and have a system that opens and closes trouble-free. Chameleon's are designed to give you peace of mind and to save you money.

1

Safety First

Our systems are fully operable without putting a foot on the truck or trailer

2

Haul Larger Loads

The standard compact corners and unintrusive tensioning system gives you the most load volume on the market.

3

Haul Heavier Loads

We minimize the weight of our systems so that you can maximize the weight of your load.

4

Reduce Downtime

The modular design of every Chameleon permits quick and easy repairs.

5

Keep Your Loads Dry

Be confident that the merchandise that you are hauling remains dry in the worst weather.

6

Increase Your Company's Exposure

We strive to offer you good looking equipment & graphics that will uphold your company's image.

7

Increase Driver Satisfaction

Retain your best Drivers with this easy-to-operate and reliable tarp system.

8

Customize Your Chameleon

We offer and design the accessories that you want & need (van doors, digital photo graphics, double lift bows & more).

9

We Guarantee

We are so confident in the quality of our products that we offer a warranty of 18 months on all parts and labor.

10

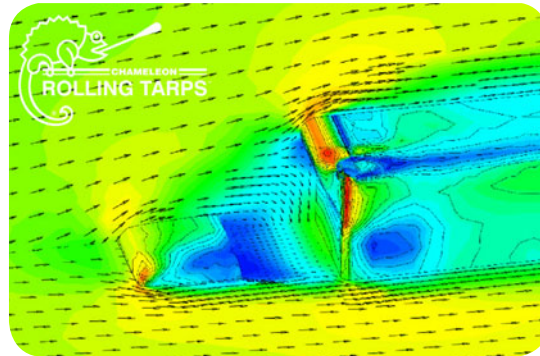

We Deliver Industry Leading Service

No matter where you are or where you go, you are not very far from an authorized Chameleon Service Center.

Visit www.rollingtarps.com to learn more about the Chameleon advantage.

"Our mission is to engineer reliable and environmentally friendly products."

Aerodynamic Headboard Design

Simulation of air deflector with air flow analysis software.

The aerodynamics of the Chameleon headboard and integrated air deflector were optimized using an air flow analysis software to offer you **improved fuel economy** while reducing the effects of tarp inflation and flapping. All air deflectors come standard and are equipped with recessed LED clearance lights.

Polished headboard with painted air deflector and access door.

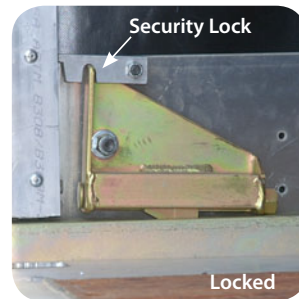

The std. white Chameleon air deflector and aerodynamic wing.

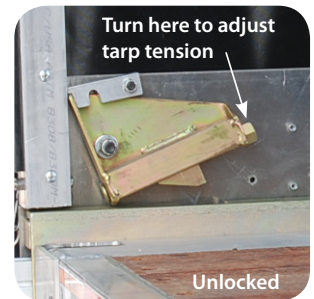

Simplified Functionality

Ergonomic rear door closures

Locked

Unlocked

The adjustable rear lock gives you the ability to fine tune your tarp tension.

Open and close the front of the tarp in two easy steps; with one integrated handle.

Operating a rolling tarp system has never been easier than with the new generation of Chameleons. Ergonomics are important. Chameleon wants to get you safely loaded, unloaded and back into your truck asap. This is why we design everything that you touch to be **quick and easy to operate** even when you have gloves on.

Visit www.rollingtarps.com to see more photos of Chameleons in action.

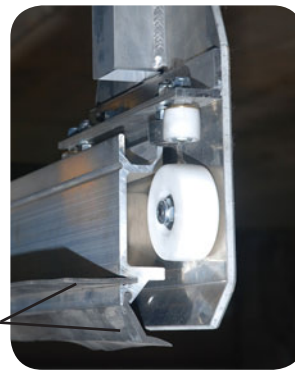

All new features are patent pending.

Weatherproof Sealing

Not only does our new wing design cut down on drag, it also incorporates a gasket to create an impenetrable seal with the sides of the headboard.

Chameleon's patented wing design compresses both top and side gaskets so that water will not leak into the front of the tarp system.

Elsewhere, we maintain the added security of our rear door gaskets (gasket compresses between door and bow). Dual mudguards along the rails block water, snow and grime from entering the rail system and loading volume. They are strap and chain friendly.

Dual mudguards

Mudguard bends around straps to keep water and snow out.

Dual mudguards are flexible enough to wrap around straps and chains and to keep road spray away from your load.

Load Clearance

All Chameleons now come standard with a rear door that rolls up and onto the roof of the system (rope operated door still available). This feature coupled with our optional **double lift bows (reducing tarp hang to less than 3" when system is retracted)**, industry-leading compact corner design and unobtrusive tensioning offers you unprecedented clearance for high loads.

We also obey federal width limits with a **headboard that remains 102", even on overwidth systems.**

Visit www.rollingtarps.com to learn more about our industry leading load clearances.

Advanced Part Replacement

The new generation of Chameleons feature an advanced tarp, door, door lock and wing attachment system. These components require only a minimal number of fasteners thus cutting repair costs and downtime in half. Unavoidable accidents do occur and we are continually expanding our service center network and ease-of-repair to keep you on the road.
